Test Scenarios For Vegan Cart

Scenario ID	Scenario Name	Scenario Description	Preconditions	Expected Value
TS_01	Verify Browse Vegan Products	Given the user is logged into the application And the user navigates to the Vegan Products category When the user views the product listing page Then all available vegan products should be displayed with name, image, and price	User is logged in	Vegan product listing is displayed successfully
TS_02	Verify Add Minimum Five Vegan Products to Cart	Given the user is logged into the application And the user is viewing vegan products When the user adds at least five different vegan products to the cart Then all selected products should be displayed in the shopping cart with correct quantity and price	User is logged in and viewing vegan products	Five different vegan products are added and reflected correctly in the cart
TS_03	Verify Cart Details Display	Given the shopping cart contains five vegan products When the user opens the cart Then the application should display Product Name, Product Image, Quantity, Unit Price, Subtotal And the Total Amount	Cart contains five vegan products	Cart displays accurate Product Name, Product Image, Quantity, Unit Price, Subtotal, and Total Amount.
TS_04	Verify Increase Product Quantity	Given products are available in the cart When the user increases the quantity of a product Then the subtotal for that product should be updated And the cart total should be updated automatically	Cart contains at least one vegan product	Quantity, subtotal, and cart total are updated correctly
TS_05	Verify Decrease Product Quantity	Given products are available in the cart When the user decreases the quantity of a product Then the subtotal for that product should be updated And the cart total should be updated automatically	Cart contains at least one vegan product with quantity greater than one	Quantity, subtotal, and cart total are updated correctly

TS_06	Verify Remove a Product from Cart	Given the shopping cart contains vegan products When the user removes one product from the cart Then the product should be removed successfully And the total amount should be recalculated	Cart contains at least two vegan products	Selected product is removed and cart total is recalculated
TS_07	Verify Proceed to Checkout	Given the shopping cart contains at least five vegan products When the user clicks Proceed to Checkout Then the application should navigate to the checkout page And all selected products should be carried forward to checkout	Cart contains at least five vegan products	User is navigated to the checkout page with all selected products
TS_08	Verify Duplicate Vegan Product Addition Updates Quantity	Given a vegan product is already present in the cart with quantity one When the user adds the same vegan product to the cart again Then the system should increase the quantity of the existing product And should not create a duplicate line item in the cart	Cart already contains the vegan product	Quantity of existing product is incremented instead of creating a duplicate entry
TS_09	Verify Checkout Blocked with Empty Cart	Given the shopping cart is empty When the user attempts to click Proceed to Checkout Then the system should display an empty cart message And the checkout should not proceed	Cart has no products added	System prevents checkout and displays an appropriate empty cart message
TS_10	Verify Quantity Cannot Be Decreased Below One	Given a product in the cart has quantity equal to one When the user attempts to decrease the quantity further Then the system should not allow the quantity to go below one And should prompt the user to remove the product instead	Cart contains a product with quantity equal to one	System prevents quantity from going below one and shows appropriate message/prompt
