Test Scenarios For Bajaj Banking Application

Scenario ID	Scenario Name	Scenario Description	Preconditions	Expected Value
TS_01	Verify Registration with All Valid Customer Details	Given the user launches the Bajaj Banking Application And the user navigates to the Registration page When the user enters valid personal, identity, and address details And submits the registration form Then the system should validate the details successfully And the customer account should be created	User has launched the application and is on the Registration page	Customer account is created successfully with all valid details
TS_02	Verify Registration Using a Valid OTP	Given the user has entered a valid mobile number during registration When the user enters the correct OTP received on the mobile number Then the mobile number should be verified successfully And the registration process should proceed to the next step	User has entered a valid mobile number and requested OTP	Mobile number is verified successfully and registration proceeds
TS_03	Verify Registration with Valid PAN and KYC Details	Given the user is on the identity details step of registration When the user enters a valid PAN number and uploads valid KYC documents Then the system should accept the PAN and KYC details And allow the registration to proceed	User is on the identity details step	Valid PAN and KYC details are accepted and registration proceeds
TS_04	Verify Email Verification During Registration	Given the user has entered a valid email address during registration When the user verifies the email address using the OTP/verification link Then the email should be verified successfully And the registration should proceed further	User has entered a valid email address	Email address is verified successfully

TS_05	Verify Password Creation Meets Security Policy	Given the user is on the password creation step When the user enters a password with minimum 8 characters including uppercase, lowercase, number, and special character And confirms the same password Then the system should accept the password And allow the user to proceed with registration	User is on the password creation step	Password meeting the security policy is accepted successfully
TS_06	Verify Successful Account Creation and Confirmation Message	Given the user has filled all mandatory details correctly And has accepted the Terms & Conditions When the user submits the registration form Then the system should validate all information successfully And display the registration confirmation message	All mandatory fields are filled correctly and Terms & Conditions accepted	Confirmation message is displayed and account is created successfully
TS_07	Verify Login After Successful Registration	Given the customer has successfully registered on the Bajaj Banking Application When the customer is redirected to the Login page And enters the registered mobile number/email and password Then the customer should be logged in successfully	Customer has completed registration successfully	Customer logs in successfully using registered credentials
TS_08	Verify Registration Blocked with Duplicate Mobile Number	Given a mobile number is already registered with an existing account When a new user attempts to register using the same mobile number Then the system should display the error message "Mobile Number already registered." And should not create a duplicate account	Mobile number is already registered with an existing account	System displays duplicate mobile number error and prevents registration
TS_09	Verify Registration Blocked with Incorrect OTP	Given the user has entered a valid mobile number during registration When the user enters an incorrect OTP Then the system should display the error message "Invalid OTP." And should not proceed with the registration	User has entered a valid mobile number and OTP has been generated	System displays invalid OTP error and blocks registration progress

TS_10	Verify Registration Blocked with Weak Password	Given the user is on the password creation step of registration When the user enters a password that does not meet the minimum security policy Then the system should display the error message "Password does not meet security requirements." And should not allow the user to proceed	User is on the password creation step	System displays password policy error and blocks registration progress
TS_11	Verify Registration Blocked When Mandatory Fields Are Left Blank	Given the user is on the Registration page When the user leaves one or more mandatory fields blank And submits the registration form Then the system should display the error message "Mandatory fields cannot be empty." And should not proceed with registration	User is on the Registration page with one or more mandatory fields empty	System displays mandatory field validation error and blocks form submission
TS_12	Verify Registration Blocked Without Accepting Terms & Conditions	Given the user has filled all mandatory registration details correctly When the user submits the form without accepting the Terms & Conditions Then the system should prevent the form submission And prompt the user to accept the Terms & Conditions	All mandatory details are filled but Terms & Conditions checkbox is unchecked	System blocks registration and prompts user to accept Terms & Conditions
TS_13	Verify Registration Blocked with Invalid PAN Number	Given the user is on the identity details step of registration When the user enters a PAN number that does not follow the valid format Then the system should display the error message "Invalid PAN Number." And should not allow the user to proceed	User is on the identity details step	System displays invalid PAN format error and blocks registration progress
